Virtual Kidney Transplant Education for Patients with ESRD

The Transplant Institute at UChicago Medicine now offers virtual kidney transplant education with our transplant outreach specialists

Through virtual outreach sessions patients have access to:

- Obtain kidney transplant information and education tailored to each patient's individual needs
- Initiate the transplant process by completing the transplant intake with the outreach coordinator
- Receive an appointment to start their transplant evaluation

Our transplant education meetings are offered in both video and telephone format. Sessions are available in English and Spanish. Patients can sign up using our convenient online scheduling platform.

Video Meetings

Video sessions are conducted using our hospital's secure Zoom account. To participate in a video session, patients must have a working email address where we can send the Zoom meeting link and access to a smartphone or computer with a camera.

Telephone Meetings

If patients do not have access to a smartphone or computer with a camera, they can select a phone session. One of our transplant representatives will call patients directly, at the phone number they provide.
